

**Try&Buy Form**

Column product number	
Column serial number	

Targeted analyte, sample matrix	
Sample preparation used	
Mobile phase composition	
Flow rate	
Pressure on the column (average, maximum)	
Column temperature	
Injection volume	
Number of injections	
Detector	
LC system – Brand (LPG/HPG)	
Shipping solvent	

## **Try&Buy conditions**

### **Duration:**

- The standard Try&Buy period is 1 month.

### **Permitted Analyses:**

- Only pure substances or certified reference standards may be analysed.
- The use of ion-pairing agents is strictly prohibited.
- If your application requires ion-pairing or any other deviation, prior consultation with a Chromservis representative is mandatory.

### **Customer Obligations:**

- The customer shall provide information about the analysis performed on the rented column, complete conditions, and chromatogram.

### **Column Return Requirements:**

- After completing all analyses, the column must be thoroughly rinsed to remove any buffers.
- Store the column in the recommended Storage Solvent (refer to the Column Care Guide or Column Quality Control Certificate).

### **Packaging and Documentation:**

- Return the column and packaging in original condition (original box without markings and end plugs in place).
- Include the Column Certificate and the completed Try&Buy form.

**The column is provided under a one-month rental agreement. At the end of the rental period, the column must be returned together with a completed evaluation report and a comparative chromatogram. Failure to return the column and the required documentation within the specified timeframe will result in Chromservis issuing an invoice for the full value of the column.**
